lambda nordica nr 2-3 2017 vol 22 postcolonial queer europe

LAMBDA NORDICA 2-3/2017 is a special issue dedicated to questions of colonialism, nationalism, racism, and fascism and why they matter for LGBTQ studies and livelihoods in contemporary Europe. Featuring five articles and one essay, our contributors offer both new concepts and original research on a range of topics from queer of color performance to homophobic rightwing nationalism in Armenia, from antiracist organizing to homonationalist development practices, and from state violence against racialized subjects to defiant activist objections. Put together, this volume contributes to a growing discussion about who the subjects of LGBTQ studies are and who belongs in Europe and how.
